

## **New high volume pad printing and new low volume digital printing equipment**

### **Kingsway Print new equipment**

Due to customers increased demand Kingsway Print has introduced a range of new equipment.

Kingsway now has the option to continuously feed its pad printing machines with rotary tables or transfer carre. This enables the printing of high volume of parts in 1, 2, 3 or 4 colours using these new machines and handling equipment. If you have demand for 10, 20, 50 thousand parts or more then Kingsway will have the answer.

At the other end of the scale Kingsway print has available one of the newest Digital UV printers in the UK that can offer full colour printing on size up to 300 x 400mm. Ideal for photograph or low volume graphic printing the Bergstein LED 330 UV Digital printer can print products 300mm high. It is also designed for printing low volume promotional work because as it has a reduced setup costs with no plate or ink mix charges.

For any of your print requirement the Kingsway team will be pleased to look at your application and offer prices for low to high volume printing.
